Technical And Vocational College

Date: 25.07.2025 08:14 AM

Time: 3 HOURS**INSTRUCTIONS TO CANDIDATE**

1. Marks for each question are indicated in the brackets.
2. The paper consists of **TWO** sections: **A** and **B**.
3. Candidates are provided with a separate answer booklet
4. **DO NOT** turn over this page.

SECTION A (40 MARKS)*Attempt ALL Questions in This Section.*

1. You are executing substructure works as a contractor. With reference to this task, define the following terms;

i. Baseline

ii. Setting out

iii. Foundation

(3 Marks)

2. Foundations contribute to stability of a structure. Outline TWO functional requirements of a foundation.

(2 Marks)

3. Setting out works precedes excavation works. List THREE equipment used in setting out a building.

(3 marks)

4. Setting out requires accuracy in right angle establishment. Outline the setting out of a building using 3:4:5 method.

(4 Marks)

5. Hardcore is a crucial component in substructure works. List FOUR functions of hardcore under a foundation slab.

(4 Marks)

6. Timbering is guided by the ground conditions. State THREE factors that influence timbering to trenches.

(3 Marks)

7. Concrete shaping is required during foundation laying. Give a precise definition of formwork and state its function.

(3 marks)

8. Construction of foundation walls requires sound materials. List FOUR advantages of natural stone over other materials for use as foundation walling materials.

(4 Marks)

9. It is not retreat the soils in execution of substructure works. State TWO the importance of anti-termite treatment.

(2 Marks)

10. Underground pressures hinder the structural stability of a structure. Outline TWO kinds of pressures a foundation wall is likely to experience.

(4 Marks)

11. Several factors contribute to performance and environmental resistance of a foundation wall. List FOUR functional requirements of a foundation wall.

(4 Marks)

12. Bonding plays a significant role in masonry stability. With the aid of a sketch, state three rule.

(4 Marks)

SECTION B (60 MARKS)

Attempt any THREE (3) questions in this section.

13. Stable foundations dictate structure

- a. Explain **THREE** factors that determine the choice of a foundation for a building. (6 Marks)
- b. Masonry construction comes with various materials. List Three Materials used on a masonry wall. (4 Marks)
- c. Transferring measurements to the ground requires precision. With the aid of a sketch, show the setting out of a foundation wall using boards. (4 Marks)
- d. Bonding in masonry works plays a significant role in the overall strength of the foundation wall. Sketch and label two alternate courses of a Flemish bond. (6 Marks)

14. Mortar should be able to meet certain minimum standards.

- a. State **FOUR** functional requirements of mortar used in foundation wall construction. (4 Marks)
- b. Anti-termite application is deemed to be necessary in substructure works. Outline the procedure of protecting a building against termite attack in ground floors. (8 Marks)
- c. Substructure works consist of different layers even though a solid ground floor. (8 Marks)

15. Foundation design depends on the several factors. Using well labeled sketches, show the details of the following types of foundation;

- a. Pad foundation
- b. Wide strip foundation

16. Safety is paramount during excavation works.

- a. List **FOUR** precautions observed when carrying out excavation of trenches. (4 Marks)
- b. Moisture penetration should be avoided in buildings, distinguish between a damp-proof course (D.P.C.) and a damp proof membrane (DPM). (4 Marks)
- c. The sides of the trench should be supported to prevent it from collapsing.
 - i. State **FOUR** factors that influence the method of timbering to trenches. (4 Marks)
